

The high-value, cost-effective system retrofit.

The Guardian® GAW system is the high-value solution for homes and complexes that require a cost-effective system retrofit. These high EER, 14 SEER models are designed for use with R-407C refrigerant, feature industry-leading warranties and meet installation requirements across the U.S. and Canada.

COST COMPETITIVE

- Designed for low cost, low operating pressure R-407C refrigerant
- Significantly less expensive than R-410A system upgrades
- Fast changeout
- Option flexibility

ENVIRONMENTALLY SOUND R-407C

- R-407C Global Warming Potential (GWP) lower than either R-22 or R-410A
- R-407C currently not on any EPA phase-out lists

FLEX COILS WITH TXV MATCHES

- True, bolt-on TXV (valve assembly and equalizer tube are available with no brazing required)
- Different TXVs are available for older copper coils (Aeroquip® fitting) and for new MaxAlloy™ aluminum coils (Chatleff fitting)

PAIRS WITH R-407C MODEL COILS

- Tin-coated copper evaporator coils designed to be installed with the system
- Over 1,100 systems matches available and certified to the DOE through the AHRI online directory at www.ahridirectory.org

INDUSTRY-LEADING WARRANTIES

Competitors don't honor system warranties when refrigerant drop-in solutions are used. GAW systems come standard with 5-year parts and 5-year compressor warranty with no registration required.
